ASCELLON

Ascellon Corporation is a quality-focused small disadvantaged business providing Management Consulting, Information Technology and Program Management services to Federal agencies since 1996. We focus on providing value and quality customer service. This is demonstrated through several performance commendations from our customers and industry quality recognitions.

Ascellon has achieved international quality recognition through our ISO 9001:2008 certification as evidence of our commitment to quality service and customer satisfaction.

From healthcare and Medicare or Medicaid issues, to grants management, to medical review and analysis, Ascellon has expertise and experience to work effectively with our customers to accomplish their missions.

CAPABILITIES

MANAGEMENT CONSULTING

- Survey, Data Collection and Analysis: Specialized in designing planning and conducting surveys. We enable our customers to use results of our analytic and data collection efforts to answer questions, predict events and improve program effectiveness.
- Metrics Development and Performance Monitoring: Enable customers to improve management control, responsiveness and productivity while cutting cost and risks.

IT SERVICES

- Electronic Content and Records Management: Provide industry-leading web content and web-based interactive data management systems to enable our customers.
- Internet & Web: Optimize customers' web strategy and operations by utilizing integration methodologies, automated tools and procedures. We emphasize on technology components, security, access control, content creation and web maintenance.
- Software Engineering: Provide comprehensive professional services for computer system development, maintenance and operation.

PROGRAM MANAGEMENT

- Medicare & Medicaid Program Integrity: Conduct comprehensive medical record reviews, data mining, data analysis, and audits to identify potential fraud, waste and abuse.
- Healthcare Performance Improvement & Quality Assurance: Specialized in conducting comparative, crisis and life safety code surveys of long term care, community mental health centers and psychiatric hospitals.
- Program & Administrative Support: Deliver technical, clerical and management support functions including records management, help desk and call center operations, training, and creating and modifying databases.
- Education and Conference Planning: Provide unique and cost-effective solutions for training and outreach. Services address specific requirements and needs of the customer and the audience.
